

Java Programming Puzzles (Set 1)

Easy

1. Reverse a number without using String.
2. Count digits without converting to String.
3. Swap two numbers without third variable.
4. Find missing number in 1..N array.

Medium

5. First non-repeating character in a string.
6. Check if two strings are anagrams.
7. Find second highest number without sorting.
8. Detect loop in linked list (Floyd's Algorithm).

Hard

9. Find A such that $N = A + \text{reverse}(A)$.
10. Implement an LRU Cache.
11. Print odd/even numbers using two threads.
12. Create a deadlock scenario.
